

Exciting STEAM Robotics Club Launch at Indian Hill School

[Holmdel, NJ, November 2] - Indian Hill School is thrilled to announce the introduction of an innovative after-school club tailored for its students. The new STEAM (Science, Technology, Engineering, Arts, and Mathematics) Club, with a focus on Robotics, promises to be an engaging and educational opportunity for all participants.

The Holmdel Public School District recognizes the importance of fostering students' interest in the exciting fields of Science, Technology, Engineering, Arts, and Mathematics. The newly established STEAM Club is set to captivate young minds through hands-on experiences in robotics, coding, and creative problem-solving.

The primary objective of the STEAM Robotics Club is to empower students with coding skills and command programming through interactive play with robots. By combining education and enjoyment, the club aims to equip students with knowledge and abilities that extend far beyond the confines of the classroom.

The STEAM Robotics Club will be under the dedicated leadership of Mrs. Griller, a passionate educator with a profound commitment to nurturing young minds and encouraging a lifelong love of learning.

Indian Hill School is excited to launch this initiative, promoting the pursuit of knowledge in a creative and entertaining way. The STEAM Robotics Club will serve as an excellent platform for students to explore the world of science and technology.
